Kidder's Gas Regulator—Saving Twenty-five per cent, with a better light

Massurers Oas Worns, Oct. 23, 1852.

The Gas Regulator of Dr. Kidder is, in my opinion, the most valuable instrument for regulating the flor of gas to the hurners that I have ever seen. It is correct in principle, any will accomplish admirably the objects for which it was designed. It will insure great staciness in the lights, and as the pressure at the motar is, by this nostrument, reduced considerably below that on the street mains, it will enable the consumer to gain an oqual amount of light at a smaller expenditure for gas, for the less the pressure under which the gas is consumed, the great or is the amount of light obtained.
